About Telit

Telit

Pioneer & Global Leader in IoT

20+
Years experience In IoT

550+
Module types

850+
Employees worldwide
(over 200 in NA)

3
Continents w/
manufacturing sites

10
Top 10 customers
comprise less than 30% of
revenues

12
Application engineering
hubs globally

80
Countries covered
around the globe

400+
Engineers across 4
continents

20+
Sales offices

21
Competence centers

シンデン・ハイテックス株式会社

Connect & Manage to Scale

Telit

Telit Modules deliver additional lifecycle value with Connectivity Plans and Software as a Service

simWISE™

Industries

Telit

Telematics & Transport
Improve efficiency and accuracy for fleet management, asset tracking, and the overall driving experience.

Smart Factory / Industry 4.0
Improve Operational Efficiency with real-time visibility into manufacturing and offer new levels of service.

Smart Buildings
Connect and automate your building and energy systems to transform the way you manage your facility.

Smart Cities / Smart Transportation
Create safer, more efficient, and cleaner cities by improving resource utilization and reducing traffic congestion.

Smart Energy & Utilities
Connect energy assets to make smarter decisions about energy distribution while enabling your customers to do the same.

Security & Surveillance
Create safer cities, homes, and businesses by remotely monitoring homes, facilities, and public spaces in real-time.

Healthcare
Improve health outcomes and reduce costs with real-time visibility into diagnostic data, health alerts, and more.

Retail
Improve the customer service experience while gaining valuable insights into trends, conditions, and supplies.

Agriculture
Leverage sensors, smart gateways, and monitoring systems to optimize farming decisions and increase output.
